## HiMS Halal Integrated Management System (HAS & QMS, EMS, OHS, BCM)

HiMS consolidates Halal Assurance System together with Quality, Environmental, Occupational Health and Safety business processes into one single system of management. The outcome leads to a management system that is leaner, more effective, more efficient and easier to follow than having a number of separate systems. HiMS better meets the needs of the business and its management and operations by streamlining similar processes to avoid duplication, with a focus on providing good business results.

### Benefits of Integrated Management System

Your organization can benefit through increased efficiency and effectiveness, and cost reductions while minimizing the disruption caused by several external audits. It also shows your commitment to increased performance, employee and customer satisfaction, and continuous improvement.

#### Halal Assurance System

- MS1500:2009 (Malaysia)
- GSO/UAE 2055:1 (UAE)

## HoS Halal-On-Steroid (HAS & ABMS)

Integrity is an integral part of Halal Assurance System thus HOS amalgamate Halal Assurance System with an Internationally reputable Anti-bribery Management System (ISO 37001) with reference to local and international statutory and regulatory requirements. This management system is designed to support organization to prevent, detect and respond to bribery and comply with anti-bribery laws and voluntary commitments applicable to its activities.

#### > ISO 37000 : Anti Bribery Management System

- Detection of bribery risks
- Implementation of measures to prevent and control bribery risk
- Overall improvement of risk assessment

#### > Halal Assurance System

## Complimentary Halal Assessment

The Halal assessment aims to identify your company's Halal competency level. This assessment is done through Desktop Audit where we will go through your documents to check the details and compliance level.
